Minutes of meeting (2022 August, 24)

Duration: 1 hour on

Participation: all on time

We reviewed the design proposal document requirements and agreed to work on the international space station web app. Some of the aspects discussed were;

- agreement to create something as a proof of concept
- Focusing on GDPR and Cyber security aspects
- The App or website will be created during the process of the upcoming week.
- Agreed to finalise the final draft on Friday the 26th in order to have more time to review the work.
- Documents will be stored on Google drive.
    - Agreed to start working on the requirements/ code within google drive and attempt to maintain the version release information on an excel sheet.
- The team also agreed to focus on the end in mind in order to avoid issues in the upcoming work requirements.

Some of the major challenges discussed:

- Lack of programming skills
- Challenge of completing the proposal with 600 words

Solutions to the challenge:

- Add more graphics/ diagrams based on concepts learned such as UML, Sequence diagrams, database diagrams and logical app diagrams.

We also agreed to meet again on the 25th, same time to further develop our ideas or work together on the same.
